Summary

Detail oriented Business Analyst and Information Technology graduate (GPA 3.76/4.00) from Universitas Jember with hands-on experience in end-to-end data collection, requirements gathering, and analysis to support cross functional business decision making. Proficient in Python, SQL, and Excel for data processing and reporting. Skilled in designing interactive dashboards using Tableau, Looker Studio, and Power BI to monitor key performance indicators. Proven ability to translate complex data into clear business narratives and structured analytical reports for non technical stakeholders. Strong analytical thinking, problem solving, and collaboration skills. Ready to contribute immediately.

Education

Universitas Jember

Aug 2021 – Jan 2026

Bachelor of Information Technology, Computer Science

GPA: 3.76 / 4.00

Experience

Rise Harisenin.com - Jakarta, Indonesia

Apr 2026 – Present

Business & Data Analyst – Bootcamp

- Gathered and documented business requirements from end-to-end case studies, translating stakeholder needs into structured analytical frameworks and actionable business insights.
- Analyzed multi source datasets using Python, SQL, and Excel to identify performance gaps, track KPIs, and deliver data-driven recommendations that supported faster decision-making.
- Built and maintained interactive dashboards in Tableau and Looker Studio, enabling stakeholders to monitor critical business metrics and align strategy with real time data.
- Prepared and presented structured analytical reports to non technical audiences, communicating findings with clarity and aligned to business objectives.

RevoU - Jakarta, Indonesia

Feb 2026

Data Analytics Mini Course – Bootcamp

- Conducted business problem analysis using Python, SQL, and Excel; applied Exploratory Data Analysis (EDA) to identify KPI performance gaps and root causes for process improvement.
- Delivered clear, structured presentations tailored for non technical stakeholders, translating complex analytical findings into concise business narratives and actionable recommendations.

Dsarea - Jakarta, Indonesia

Jan 2026 – Feb 2026

Data Analytics & Visualization – Bootcamp

- Executed data cleaning, validation, and EDA using Python and Excel to ensure data quality and accuracy, establishing reliable data foundations for business reporting.
- Transformed raw data into actionable dashboards that enabled decision makers to monitor KPIs, identify performance trends, and drive strategic business initiatives.

Perum Perhutani (MAGENTA) - Banyuwangi, Indonesia

Mar 2024 – Jun 2024

Data & System Intern

- Managed and analyzed operational data across divisions to support reporting accuracy, system efficiency, and data integrity for business operational needs.
- Collaborated with the planning division to produce strategic reports, translating raw data into structured business insights that informed cross divisional decision making processes.
- Supported system maintenance and development to improve data workflows and ensure data availability, consistency, and reliability across operational functions.

Data Analytics for Climate Change & Sustainable Development

- Analyzed climate change datasets using Python and Google Colab to identify patterns, correlations, and inter variable relationships, supporting evidence based business recommendations.
- Built a monitoring dashboard using Looker Studio and delivered data driven recommendations aligned with sustainable development goals, presenting findings to program stakeholders.
- Managed end-to-end data workflows from raw data collection and EDA to final insight presentation, demonstrating strong ownership, attention to detail, and data accuracy.

Skills & Interests

Technical: Python, SQL (PostgreSQL, MySQL), Microsoft Excel, Google Colab

Business Analysis: Requirements Gathering, Business Process Analysis, KPI Monitoring, Data Quality Assurance, Stakeholder Reporting, Documentation

Visualization: Tableau, Looker Studio, Power BI, Dashboard Development, Exploratory Data Analysis (EDA)

Microsoft Office: Excel (Advanced), Word, PowerPoint, Outlook

Soft Skills: Analytical Thinking, Problem Solving, Stakeholder Communication, Cross functional Collaboration, Presentation
