Fresh Graduate Fullstack Developer with demonstrated experience building real world web systems across the full stack from database design and REST API development to responsive frontend interfaces. Skilled in Go, Laravel, Node.js, Next.js, and Vue.js with hands on delivery of systems currently used in production by Perhutani. Strong foundation in system design, layered architecture, and multi role authentication ready to contribute immediately in a professional engineering environment.

PROJECT EXPERIENCE

SpendWise – Personal Finance Management Web App <i>Fullstack Dev</i> - Finance tracker with Next.js frontend and Go REST API backend, implemented JWT authentication with multi user data isolation. - Designed layered backend architecture with centralized auth middleware, DTO pattern, and standardized API responses for maintainability. - Built real-time financial dashboard with advanced filtering (category, date, amount), monthly report generation, export functionality, and custom transaction category management.	2026
Rental PlayStation Web App <i>Fullstack Dev</i> - Engineered a real-time web-based rental management system using React, Node.js, and PostgreSQL to manage console availability, transactions, and operational workflows. - Implemented automated commission and payroll calculation based on service transactions, ensuring consistent and accurate financial records. - Developed admin modules for managing products, pricing, users, and reporting to support end-to-end business operations.	2026
Hair Studio Operational System Web App <i>Fullstack Dev</i> - Developed an internal operational system using Laravel and MySQL to centralize transactions, services, products, payroll, and daily expense tracking. - Designed interactive console dashboard with live status tracking (available, in-use, maintenance) and one click transaction initiation to streamline cashier operations. - Built reporting features with summarized dashboards and CSV export, enabling owners to quickly monitor business performance and daily operations.	2026
SIPANDA-KPH – Employee Information & Task Monitoring System <i>Final Project Intern at Perhutani (MAGENTA)</i> - Designed role-based information architecture and multi-role authentication (admin, employee, KPH) to deliver context specific workflows and improve operational clarity. - Developed task assignment, validation, and monitoring modules with dashboard summaries, enabling real time visibility of progress, approvals, and activity logs across units. - Built a centralized Laravel based system integrating employee data, task records, and reporting, improving administrative control and reducing fragmented manual processes.	2024

EDUCATION

University of Jember - Jember, Indonesia <i>Bachelor of Information Technology, 3.76/4.00</i>	Agu 2021 - Jan 2026
---	---------------------

ADDITIONAL EXPERIENCE

Perum Perhutani (MAGENTA) - Banyuwangi, Indonesia <i>Data & System Intern</i> - Cleaned, preprocessed, and transformed operational datasets, built data visualization dashboards to support data driven reporting and decision making. - Developed a web based internal application to support operational data management and streamline reporting workflows.	Mar 2024 - Jun 2024
Smart Agriculture Laboratory - UNEJ <i>Laboratory Assistant</i> Supported laboratory practical sessions and experiments in Smart Agriculture, assisting in data processing, ensuring structured workflows, and connecting technical concepts to real-world implementation.	Jul 2023 - Mar 2024
Geographic Information System Laboratory - UNEJ <i>Laboratory & Lecture Assistant</i> Assisted in teaching Operating Systems courses using Linux, guiding students through system fundamentals, command-line usage, and hands-on practical sessions.	Aug 2022 - Jun 2023

TECHNICAL SKILLS

Frontend	: React.js, Next.js, Vue.js, HTML, CSS, TypeScript, Tailwind CSS, Laravel Blade.
Backend	: Node.js, Express.js, Laravel, Go
DBMS	: PostgreSQL, MySQL, Google Big Query.
Tools	: Git, GitHub, Docker.
Other	: REST API, JWT, System Design, API Integration.

CERTIFICATION

- Sertifikasi g** (2026): Fullstack WebApps DevOps (From Idea to Cloud – All in One). – Udemy
